

Our vision.

We become one of the leading providers of cross-domain solutions worldwide.

We are consistently and sustainably strengthening our position in the market. To this end, we are expanding our product portfolio and positioning ourselves internationally for the long term. Our technologies are designed to rethink end-to-end process digitization and secure system architectures.

We will be the spearhead of innovative information security.

Continuous technological innovation is the key to our company's success. Our innovative products, consulting services and hybrid thinking make us the expert of choice for evaluating and introducing new technologies.

We become long-term enablers for our customers.

In the highly dynamic environment in which our customers operate, we are the partner that provides stability: trustworthy, solid, long-term. Secure digitalization is not a project, but a continuous process that must take into account constant regulatory changes and diffuse cyber threats with ever new attack vectors and risks. Our goal is to be the constant and reliable information security partner for our customers.

Our mission statement — connect more. be secure.

Making the (digital) world safer together

We are a subsidiary of Airbus Defense and Space and information security and state-of-the-art technologies are our passion. With our products and services, we enable secure, crosssystem and cross-domain digitalization in the public sector and in business.

connect more. be secure. - What does our mission statement mean?

With connect more. be secure. we are expressing our responsibility and role in the digital age. Virtual organizations, distributed infrastructures and networked operations management - the end-to-end digitalization of processes and systems and the resulting increase in networking are indispensable: **connect more.**

However, more networking also means more sensitive points. This is why the security of digital connections is a top priority. Across system and domain boundaries. We guarantee this at all times: **be secure.**
